### **New conclusions of the dissertation**

1. The dissertation states that, with the reflection and conveyance of local history and culture in educational activities on the basis of typical cultural heritages, provincial and city museums are the space to introduce, practice, interact, experience and acquire knowledge and information about the locality.

2. The dissertation points out the change in the process of conveying and acquiring historical and cultural messages from provincial and city museums, especially the role of factors; museum staff, visitors, tradition bearers interact with and participate in the process of connecting, suggesting, experiencing and perceiving based on the typical cultural heritages of the locality.

3. The dissertation contributes to affirming the development trend of local historical and cultural education activities of provincial and city museums in Vietnam such as paying more attention to intangible cultural heritages, honoring the specificity of each locality in the regional cultural context, in the relations with the country; being open, humane and accessible.

4. The dissertation discusses the issues of access to local cultural heritages and determines the intermediate and connecting position of the museums; is a practical basis for provincial and city museums to refer to, develop activities, effectively implement education on local history and culture, serve the needs of learning, sightseeing and cultural enjoyment of the public.
