Thesis title: *The role of self - governance of the community in preserving and promoting the cultural heritage of the Tien Cong family in Quang Ninh.*

Major: Cultural Management

Code: 9229042

Scientific Supervisor: Asso Prof. Dr. Nguyen Xuan Hong

Institution: Vietnam National Institute of Culture and Arts Studies

Content of the abstract

1. Aims and Object of the study

Aims of the study: The dissertation focuses on researching both theoretical and practical aspects of community self-management in the preservation and promotion of cultural heritage values within the Tiên Công family lineage in Quảng Ninh. Subsequently, it proposes solutions to enhance the effectiveness of preservation and promotion of cultural heritage values within the Tiên Công family lineage in the present context.

Object of the study: The community's self-management role in preserving and promoting the cultural heritage values of the Tiên Công family lineages.

2. Research methods used

The dissertation employs various research methods, including quantitative methods (statistics, data synthesis, and analysis), qualitative methods (quick interviews and in-depth interviews), ethnographic cultural fieldwork methods, and comparative methods.

3. Main results and Conclusions

3.1. Main results

The research outcomes of the thesis contribute to establishing a theoretical foundation for analyzing the current situation and proposing solutions to progressively enhance the community's self-management effectiveness in preserving and promoting cultural heritage, both in general and specifically within the Tiên Công family lineage in Quảng Yên.

Additionally, the research results provide clearer evidence for the application of research theories in the specific thesis, particularly the theory of roles.

The findings of the thesis can serve as a scientific basis for adjusting, issuing, and implementing appropriate policies and strategies promptly, providing legal motivation for conserving and promoting the cultural heritage of the Tiên Công family lineage in contemporary life. The proposed solutions in the thesis can gradually help the Tiên Công family lineages improve the effectiveness of their self-management activities in preserving and promoting the cultural heritage values that align with the current societal

development conditions. Moreover, the research findings can be used as reference material in various training programs for different target groups in relevant fields.

3.2. Conclusions

- The cultural heritage values, both tangible and intangible, have been safeguarded and promoted by the Tiên Công family lineages to this day. These values are the results of the formation and development processes of the Tiên Công family lineages in the Quảng Yên region, Quảng Ninh province. However, the current cultural heritage of the Tiên Công family lineages faces numerous challenges in conservation, sustainable exploitation, and effective utilization.

- The community's self-management role in preserving and promoting the cultural heritage of the Tiên Công family lineage is the foundation for sustainable community cultural development. On the other hand, promoting the cultural heritage values of the family lineages is closely tied to the socioeconomic development, intellectual improvement, and providing opportunities for people to access the new values of humanity. Community self-management regarding the cultural heritage of the Tiên Công family lineage has positively impacted the lives of the local residents and requires attention through practical and suitable methods and solutions to ensure the preservation of the traditional cultural values of the region.

- The cultural heritage of the Tiên Công family lineage plays a crucial role in the Tiên Công community and the Quảng Yên region as a whole due to its unique and distinctive cultural heritage values that characterize the area. The cultural heritage of the Tiên Công family lineage can become outstanding tourist products, with high value, attracting tourists to Quảng Yên, Quảng Ninh.
